# Security Updates for Microsoft and other vendors for April 2023

Dear Constituents,

Microsoft's has released their security updates. They have released fixes with a total of 97 Vulnerabilities. Out of these vulnerabilities, 90 are classified as Important and 7 are classified as Critical, as they allow remote code execution, the most serious of vulnerabilities.

## Patches from other vendors are also available as follows:

- Android's Security Bulletin for April 2023 is detailed here: *https://source.android.com/docs/security/bulletin/pixel/2023-04-01.*

- Chrome's Security Update: *https://chromereleases.googleblog.com/*

- Apple's Security Update: *https://support.apple.com/en-us/HT201222*

- Adobe's monthly security update: *https://helpx.adobe.com/security.html*

- Cisco's Security Update: *https://tools.cisco.com/security/center/publicationListing.x*

## What to do

Users and administrators are strongly recommended to install these security updates as soon as possible to protect Windows and the relevant products from security risks.
