Security Updates for Microsoft and other vendors for February 2023

Dear Constituents,

Microsoft's has released their February Patch Tuesday security updates. They have released fixes with a total of 77 Vulnerabilities. Out of these vulnerabilities, 9 are classified as Critical, as they allow remote code execution, spoofing, Denial of Service and privilege elevation.

Patches from other vendors are also available as follows:

- Android's Security Bulletin for February 2023 is detailed here:
<https://source.android.com/docs/security/bulletin/pixel/2023-02-01>
- Chrome's Security Update: <https://chromereleases.googleblog.com/>
- Apple's Security Update: <https://support.apple.com/en-us/HT201222>
- Adobe's monthly security update: <https://helpx.adobe.com/security.html>
- Cisco's Security Update: <https://tools.cisco.com/security/center/publicationListing.x>

What to do

Users and administrators are strongly recommended to install these security updates as soon as possible to protect Windows and the relevant products from security risks.
